

## **South Carolina Communities Receive Fluoridation Awards**

Three South Carolina communities received Certificate of Appreciation 50-Year Awards given by the Association of State Territorial Dental Directors (ASTDD) and the Centers for Disease Control and Prevention (CDC). These communities are:

**City of Hartsville**  
**Rock Hill**  
**Orangeburg Department of Public Utilities**

This award honors those communities across the nation which have made significant and long-term contributions in fluoridating community water to prevent tooth decay.

Congratulations to these communities for their efforts in improving the oral health of their citizens.
